### About MEDLINE® and PubMed®: The Resources Guide

IM was a comprehensive bibliographic index of scientific journal articles related to medical science, in print form, published between 1879 and 2004. NLM began computerizing indexing work in 1960 and called it MEDLARS, a bibliographic database, which later became MEDLINE. Thus, IM became the print presentation of MEDLINE databases content.

### What is indexing

Finding resources: MEDLINE. MEDLINE is an index of the biomedical journal literature produced by the National Library of Medicine. Nearly 5,000 journals are read and their individual articles indexed and added to the MEDLINE database, which contains information about over 12 million journal articles.
